huperRemote bViewer (Keypad Version) Quick Guide

huperRemote bViewer for keypad supports online video surveillance for BlackBerry mobile phones with keypad. Remote users can easily operate video surveillance systems, like video camera monitoring, and PTZ camera control as on the computer. huperRemote bViewer offers single split screen view, one touch snapshot, and on-screen PTZ control.
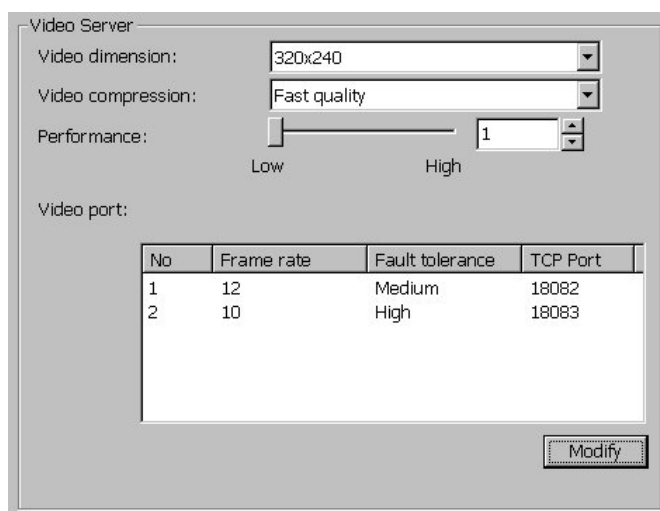

Installing huperRemote bViewer for keypad
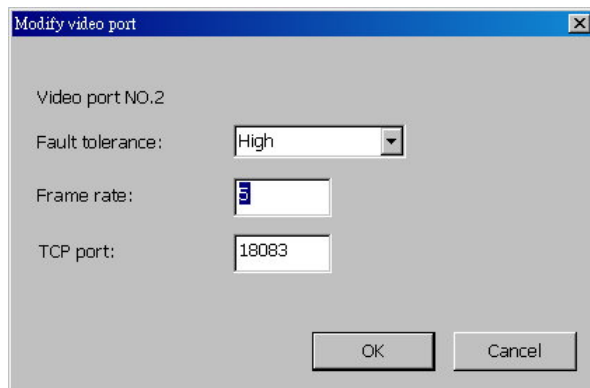

Modify Video Port Setting

Please make sure the surveillance system is huperVision v.1.53 or above before using huperRemote bViewer for keypad.

Follow the steps below to adjust video port setting:

■ Press hammer button, and select preferences from pop-up menu.

■ Switch to Network tab, select the video port 18083 in the list of Video server group box and Press Modify button.

■ Modify the value of frame rate as 5 (recommended value).

Check Platform Version

Follow the steps below to check BlackBerry OS version:

■ Select Options in the application list

■ Select About from the option list

■ Check the platform version number

BlackBerry.

Install bViewer

Please follow the steps below to install huperRemote bViewer for keypad:

■ Download huperRemote bViewer for keypad from huperlab website
http://www.huperlab.com/english/support/update/update.htm
Extract the downloaded file into a folder and there should be two files ~ bViewer.alx
and bViewer.cod.
Note: Download version 4.7 for platform version or above, otherwise please
download version 4.5.

■ Run BlackBerry Desktop Manager. If you don't install BlackBerry Desktop Manager
in you PC, please download from http://na.blackberry.com/eng/services/desktop/ and
install it.

■ Connect your BlackBerry to PC and select "Application Loader".
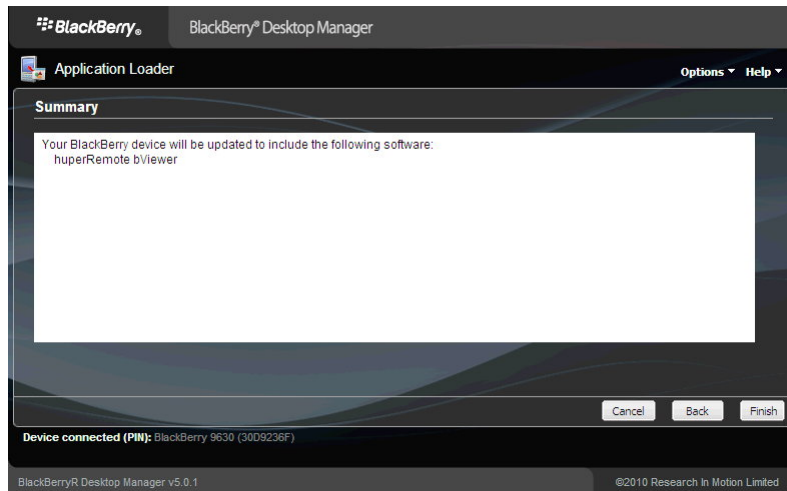

■ Click Start button to Add/Remove Applications.

■ Click Browse button to select file "bViewer.alx" in the folder where you extract the program.

■ Click Next button to confirm install application.

■ Click Finish button to start installation.

■ The installation is successful when you see this message. And you can now start to use huperRemote bViewer for keypad.
